Ike Kavas is the founder and CEO of Ephesoft, a leader in intelligent document processing focused on accelerating productivity with automation. He helps customers in 50 countries with his global team in the Americas, Europe and Asia. Ike's entrepreneurial drive fuels him as a passionate technology innovator, AI and machine learning advocate, speaker and customer-obsessed trailblazer.

His mission is to leave a legacy by helping the next generation achieve their goals through entrepreneurship and being good citizens of the world. He came to the United States with nothing and built a business through hard work and grit, which is proof that the American Dream is alive and here to stay. Ike embraces both his and Ephesoft's values of helping to elevate others in the community by actively engaging with programs like the CEO Leadership Association (CLA-OC) and his recent appointment as a Board member to Pepperdine University's Graziadio Business School.

In addition, Ike holds a patent on supervised machine learning for document classification and extraction. He is a serial entrepreneur with three ventures and successful exits. He has not only a technical background from implementing several multi-million dollar projects for Fortune 100 companies but has also accumulated extensive sales, business, financial and operational experience.

Ike earned his BS degree in Electrical and Electronics Engineering and studied Computer Architecture at Anatolia University.
